

2018 Training Classes

2-Axis (2 days)

Day 1: Learn the fundamentals of SURFCAM, including Graphical User Interface (GUI) features. Create and edit lines, arcs/circles, fillets, chamfers, text and dimensions.

Day 2: Learn toolpath creation features pertaining to 2 ½ -axis machining such as pocketing, contouring, drilling, engraving, face, groove and chamfer milling, and TrueMill. File management, toolpath verification, and setup sheet creation will also be introduced.

2-Axis Turning (1 day)

Create turning profile using lines and polylines. From roughing to final finish, create gouge free-paths that include turning, grooving and threading. SURFCAM Verify and cycles such as turn, face, face off, groove, thread, drill and part off are covered.

3-Axis Machining (3 days)

Day 1: Focus on 3-axis simultaneous machining. Create and edit splines, cross sectional surfaces, drive curve surfaces, blend surfaces, trim plane surfaces, offset surfaces, surface fillets, revolved and extruded surfaces.

Day 2: Focus on surface toolpath generation. Learn the fundamentals of machining single and multiple surfaces: cut, z-rough, project, planar, Z-finish 3D contour and offset. Learn the more challenging 3D toolpath creation concepts and design principles: Steep/Shallow machining, Rest Machining, Adaptive Step down and other high-speed machining functions. Boundary and flow curves, surface project and cutter intersect splines are explained in detail.

Day 3: Create advanced splines & surfaces, file import/export, creating views, machining with boundary curves, Steep/Shallow, 3-axis project, and other machining tips & tricks. The new Multi-Cut options with 6-cut strategies, enhanced Leads and Links, multi-surface gouge protection and undercuts will be covered. STL model machining along with the new Machine Simulation option will be reviewed.

Advanced 2-Axis Machining (1 day)

Intended for the experienced 2-axis SURFCAM user, topics may include using layers and masking, 4-axis positioning, creating views, Advanced Operations Manager topics, post processor customizing, and other 2-axis machining tips and tricks.

Advanced 3-Axis Machining (1 day)

This one-day class is intended for the experienced 3-axis SURFCAM user. Topics covered will include but not limited to the following... Creating advanced splines & surfaces, file import/export, creating views, machining with boundary curves, steep/shallow, 3-axis project, and other 3-axis machining tips & tricks. Students are encouraged to bring in parts for review.

Custom Web Based Training (Per Two Hour Session)

This custom two hour web based training is operator training per requested subject.

To register, contact
 Applied CIM Technologies at: cadcam@appcim.com
 763-476-4268
 See next page for schedule and registration form.
